Operations and Supply Chain Manager, Mumbai, India | Full Time

This role is only for those who are focussed, organized and great at multitasking. You will be responsible to handle end to end Operations for a fast growing social enterprise.

Saral Designs has developed world's first automatic and compact ultra-thin sanitary napkin making machine – Swachh. With local production and distribution at a decentralized scale using Swachh, several local manufacturers can produce sanitary napkins at low cost, closer to the consumer increasing last mile access.

Your role is to support our production partners with raw material supply chain, finished good buy back and to ensure seamless production at our decentralized units which will help us solve the problem of menstrual hygiene in this country.

Role & Responsibility

- Handle end to end client Operations from setting-up production unit, to training management, to supporting raw material and finished goods supply chain with production partners all over India and abroad
- Able to negotiate with raw material vendors and foster strong relationships
- Have a good understanding of the Engineering behind Swachh and the business aspects of the production unit
- Develop and manage systems for seamless backend execution of Operations in different geographies

Requirements

- Prior experience of 3-5 years in handling Operations and multiple teams, preferably in feminine/infant hygiene industry
- Start-up attitude: quick execution, self-drive and willingness to work long hours
- Ability to work with Excel, Operations management softwares
- Strong written and verbal communication skills, able to deliver clear, concise information to partners, clients and team with a strong ability to multitask
