Quality and Testing Engineer, Mumbai, India | Full Time

Saral Designs is a product driven start-up with the mission of solving critical problems in the field of menstruation, hygiene and sanitation.

We believe that local production and distribution can disrupt the largely under-served menstrual hygiene market. We have developed India's first indigenously designed machine Swachh for producing ultra-thin sanitary napkins at a decentralized scale. While decentralization cuts down the distribution costs, the automated production ensures economies of scale and product quality.

The role of the Quality and Testing Engineer will be to take care of Engineering requirements of Swachh Machines from ensure testing and quality control for Swachh machine modules.

Role & Responsibility

- To support the Assembly, Production and Fabrication Department
- Quality Production/ Hydraulic testing and Handling
- Review requirements, specifications and technical design documents to provide timely and meaningful feedback.
- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities
- Perform thorough regression testing when tests are resolved
- Track quality assurance metrics, like defect densities and defect count
- Monitor debugging process results
- Stay up-to-date with new testing tools and test strategies

Requirements

- Willingness to travel within and outside of India. Applicant must hold a valid passport
- Relevant technical expertise (in machine troubleshooting and operations in Electrical, electronic and mechanical background)
- Start-up attitude: quick execution, self-drive and willingness to work long hours
- Strong written and verbal communication skills, able to deliver clear, concise information to partners, clients and team
- BE degree/Diploma in Mechanical/Production Engineering
- Hands on experience GD&T
- Experience in writing clear, concise and comprehensive test plans and test cases
